Disclaimer Collective investment schemes in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Unit trust returns are not guaranteed. An investment in the participations of a collective investment scheme in securities is not the same as a deposit with a banking institution. Participatory interest prices are calculated on a net asset value basis, which is the total value of all assets in the Portfolio including any income accrued and less any permissible deductions from the Portfolio divided by the number of participatory interests in issue. Permissible deductions include brokerage, STT, auditor's fees, bank charges, trustee/custodian fees and the service charge levied by STANLIB Collective Investments Limited ("the Manager"). Where exit fees are applicable, participatory interests are redeemed at the net asset value where after the exit fee is deducted and the balance is paid to the investor. A Portfolio of a collective investment scheme in securities may borrow up to 10% of the market value of the Portfolio to bridge insufficient liquidity as a result of the redemption of participatory interests, and may also engage in scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Manager. Commission and incentives may be paid and if so, would be included in the overall costs.
